

Archives Aero Flyer

Follow the directions below to make the Aero Flyer. For the best plane, make sure your folds are tightly creased.

1. Start by placing the paper on the table with the point of the airplane facing up.

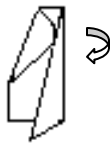

2. Fold the top corners in toward you. Make these folds on lines A.

3. Fold in on lines B.

4. Fold the tip down.

5. Flip the paper over. Fold on line C. The two sides should fold in toward each other.

6. Turn paper over again. Fold in on the center line. Open the wings up and hold the plane from underneath. Give it a throw and watch it fly! Personalize the flyer by decorating it with crayons or markers.
